

Notes

Creative Director: Veronica Susovica

Designer: Grace Jung

*Site: Animal Crossing New Leaf*

When opening the website, you are greeted with a closed 3Ds that opens. There, an animal crossing icon/app appears which you can click on. Referencing the game, Rover OR Isabelle then greets the visitor. Afterwards, you are taken to the homepage which has multiple tabs.

We decided on having multiple pages through clickable tabs instead of a continuous scroll. And one idea was to have the background change seasons whenever you switch tabs: 4 tabs for 4 seasons. The seasons are also a crucial part of the game, which is why it would be a nice detail.

Typeface will also probably be exactly from the game or close to it.

Another idea was to have background music from the game playing throughout the website. (Example: "1 AM" ACNL OST)

We also decided on sticking with the outline from the "Content Outline".
